University of Education Lahore, Pakistan

Bachelor of Computer Science - 3.7 CGPA

August 2023 - September 2027

PROJECTS

Pak Doc (Html, Css & Js) [🔗](#)

- Created a responsive website UI for a healthcare platform using HTML, CSS and Javascript.
- Translated design concepts into a clean and accessible layout, optimized for readability.
- Ensured cross-device compatibility and intuitive navigation for both mobile and desktop users.

Pak Doc (Html, Tailwind) [🔗](#)

- Built a responsive website UI using HTML and Tailwind CSS.
- Used utility-first classes to streamline styling and accelerate layout development.
- Created a clean, consistent design with reusable components and mobile-first responsiveness.

Solar Company - Landing Page [🔗](#)

- Designed and developed a visually appealing, responsive landing page promoting solar energy services using clean HTML, modern CSS, and JavaScript.
- Built mobile-first layouts with Flexbox and media queries to ensure optimal viewing experience across all devices.
- Optimized performance and SEO readiness through semantic HTML structure and lightweight code practices

Pet Care - AI Powered Pet Health Checker [🔗](#)

- Built a responsive PetCare website using HTML, CSS, and JavaScript, featuring interactive UI elements and structured content for pet services.
- Designed and implemented mobile-friendly layouts with smooth transitions and user-friendly navigation, optimized for deployment on Vercel.

Weather App - Using Weather API [🔗](#)

- Built a responsive weather application using vanilla JavaScript that fetches real-time weather data through an external Weather API.
- Implemented dynamic DOM manipulation to update weather information instantly based on user input (e.g., city name)
